

## Network Checklist

Please complete this checklist and fax back to Dakim Inc. at (310) 8291865 or email support@dakim.com.

### » Dakim BrainFitness System Network Requirements

Using a computer connected to the network where your Dakim BrainFitness System will reside; please check the following to be sure your system can communicate with Dakim Inc. from your network:

- The Dakim BrainFitness System is attached to a network with Internet connectivity.
- Wireless Networks Only: The access point is either configured without authentication or configured using WEP, WPA or WPA2 authentication.
- All Dakim BrainFitness Systems in the same Pod must be allowed to connect to each other via TCP and UDP broadcasts. (TCP and UDP broadcasts must be allowed on the network)
- The following ports are open for outside communication on your network.  
**TCP:** 22, 25, 123, 80, 873, and 7089                      **UDP:** 123
- Your network does not use a proxy server.
- Your Internet connection must have a minimum download speed of 768 kbps.

### » DakimADMIN Network Requirements

Note: Customers using Citrix or other virtualization products should contact Dakim at (800) 853-7289 to discuss additional requirements with a support engineer.

- The DakimADMIN program requires a computer connected to a network with Internet connectivity with Java 1.5 or greater installed.
- Port 8081, 1099 and port 80 must be open on the network for TCP and UDP traffic.

### » Network Administrator Information

I have read and hereby confirm that the network hosting the Dakim BrainFitness System complies with the above requirements.
